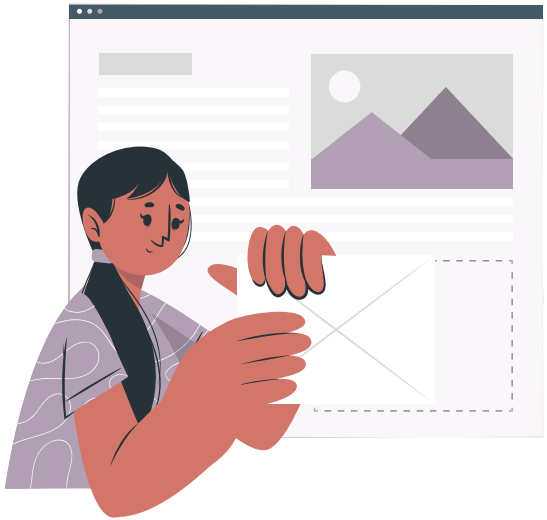
01

Problem and Solution



Problem

- A lot of Hijabi girls face difficulties in finding affordable and customizable hijabs in their local area, as the limited options either come with an overpriced tag or lack the personalization they desire.

Solution

- We decided to create an online Hijab store to make it easy for women who desire affordable, pretty, and fashionable Hijabs. Not only that, but they can also customize them to match their style perfectly.

Lessons learned

Lessons Learned

- Design Process
- Learning how to incorporate different types of files such as CSS, HTML, and Javascript.
- Team Work

04

Bugs and Future Version

Issues/ Bugs known

- White bars in Navbar
- Margin alignment
- The Search Bar is not linked to anything

Future Version

- Add log in (Members)
- Add a cart icon
- Make a next page for the products
- Display Coupons
- Make a reviews page
