Marwa Hammami

1. Problem

- Bring an aesthetically diverse and quality hijab store to the market.
- A lot of Hijabi girls face difficulties in finding affordable and customizable hijabs in their local area, as the limited options either come with an overpriced tag or lack the personalization they desire.

2. Solution

- Create a website for the marketing and sale of hijabs
- We decided to create an online Hijab store to make it easy for women who desire affordable, pretty, and fashionable Hijabs. Not only that, but they can also customize them to match their style perfectly.

4. Lessons Learned

- Design Process
- Learning how to incorporate different types of files such as CSS, HTML, and Javascript.
- Good Teamwork

5. Issues/Bugs Known

- White bars in Navbar
- Margin alignment
- The Search Bar is not linked to anything

6. Future Versions

- Add a cart
- Add a Login
- Display coupons
- Make a next page for the products

7. References

- ChatGPT generative images
